Resolution of Consumer Facing Switching and Billing Issues

4

Section C: Switch Meter Reading Problems

7 Description of the Problem

- 7.1. As part of a <u>Switch</u>, a <u>Switch Meter Reading</u> must be determined to ensure that the <u>Consumer</u> receives an accurate opening and closing bill. The <u>Switch Meter Reading</u> will also establish a single point at which responsibility for the consumption at the <u>RMP</u> transfers from the <u>Losing Supplier</u> to the <u>Gaining Supplier</u>.
- 7.2. The arrangements for obtaining gas and electricity <u>Switch Meter Reading</u>s are detailed in the <u>UNC/IGT UNC</u> and <u>BSC</u> respectively.
- 7.3. The resolution of <u>Switch Meter Reading</u> problems covers the following scenarios:
 - (a) the proposed <u>Switch Meter Reading</u> is disputed by the <u>Consumer</u>, <u>Losing</u> <u>Supplier</u> or <u>Gaining Supplier</u> (referred to as a <u>Disputed Switch Meter Reading</u>), and 12 months have not passed since the <u>Supply Effective From Date</u> (or later, where the <u>Energy Supplier</u>s have bilaterally agreed to follow this process);
 - (b) for a gas <u>RMP</u>, where an actual or estimated <u>Switch Meter Reading</u> has not been received from the gas <u>Central Data Service Provider</u> (CDSP) by the <u>Losing</u> <u>Supplier</u> (via the <u>Shipper</u>) within 15 <u>Working Days</u> of its <u>Supply Effective Through</u> <u>Date</u>, or by the <u>Gaining Supplier</u> within 17 <u>Working Days</u> of its <u>Supply Effective</u> <u>From Date</u>;
 - (c) (c) for an electricity RMP_MHHS Metering Point where supply is measured by a meter that is not a <u>DCC Enrolled MeterTraditional Metering Asset</u>, where a <u>an</u> actual<u>Customer Own Read</u> or estimated Switch Meter Reading has not been received from the <u>Data Collector</u> by the Losing Supplier_<u>within 15</u>. Working Days of its <u>Supply Effective Through Date</u> or by the Gaining Supplier within 17 10 Working Days of <u>its_the Gaining Supplier's</u> Supply Effective From Date; or
 - (d) (d) for an electricity MHHS Metering Point RMP where supply is measured by a DCC Enrolled MeterSmart Metering Asset, where the Losing Supplier or Gaining Supplier has been unable to retrieve actual data from the Smart Metering Asset and has not received an actual or estimated Switch Meter Reading from the Losing Smart Data Service obtain a Meter Reading from the DCC Enrolled Meter but has not received a proposed Switch Meter Reading from the Gaining Supplier within 10 Working Days of the Gaining Supplier's Supply Effective From Date;-
 - (e) for a Non-MHHS Metering Point, where supply is measured by a meter that is

not an Enrolled Smart Meter, where an actual or estimated Switch Meter Reading has not been received from the Data Collector by the Losing Supplier within 15 Working Days of its Supply Effective Through Date, or by the Gaining Supplier within 17 Working Days of its Supply Effective From Date; or

(f) for a Non-MHHS Metering Point, where supply is measured by an Enrolled Smart Meter where the Losing Supplier has been able to obtain a Meter Reading from the Enrolled Smart Meter but has not received a proposed Switch Meter Reading from the Gaining Supplier within 10 Working Days of the Gaining Supplier's Supply Effective From Date.

7.4. For MHHS Metering Points, in the event that the Gaining Supplier requires Meter Register Readings for Smart Metering Assets, they may use the last Register Reading (J0040) provided via the Notification of Losing Supplier Information (D0311) Market Message. Where this data is not available, the Register Readings should be requested from the Losing Supplier via the SDEP.

8 **Resolution Outcomes**

- 8.1. In addition to the relevant requirements in Paragraph 2, the resolution of <u>Switch</u> <u>Meter Reading</u> problems needs to deliver the following minimum outcomes to be considered complete:
 - (a) the <u>Gaining Supplier</u> and <u>Losing Supplier</u> have respectively opened and closed the <u>Consumer</u>'s account details on the same <u>Switch Meter Reading</u> (or agreed otherwise);
 - (b) where appropriate, the <u>Consumer</u> has been sent amended opening and / or closing bills <u>covering</u> the full disputed period. Consumer billing should be <u>corrected</u> for the full period of erroneous data, regardless of whether an <u>equivalent correction is applied within settlements</u>; and
 - (c) both the <u>Gaining Supplier</u> and <u>Losing Supplier</u> have received a <u>Switch Meter</u> <u>Reading</u>⁴ in accordance with the <u>UNC</u> / <u>IGT UNC</u> or <u>BSC</u> (as applicable). <u>In the</u> <u>case of Gas Suppliers</u>, the Switch Meter Reading will be received via the Shipper. In the case of an electricity Switch Meter Reading that has been subject to final reconciliation in settlement, the Gaining Supplier and Losing Supplier shall meet the outcomes in 8.1(a) and 8.1(b) regardless of whether the Switch Meter Reading is capable of amendment with their Data Service Agent or Data Collector, as applicable.

⁴In the case of <u>Gas Suppliers</u>, the <u>Switch Meter Reading</u> will be received via the <u>Shipper</u>.

6

Resolution of Consumer Facing Switching and Billing Issues

Copyright 2024 Retail Energy Code Company

Commented [SJ8]: Mop Up Update - bullets e and f added as part of transition drafting to reflect legacy rules applicable to Non MHHS Metering Points

Commented [SJ9]: Mop Up Update - amended to add "For MHHS Metering Points only" to reflect the transition requirements

Commented [SJ10]: Discussed and agreed as a consequential change by the REC MSAG

Commented [SJ11]: Gas reference moved from footnote

Commented [SJ12]: Mop Up Update - amended to Data Service Agent rather than Data Service to reflect the term used in the BSC to define the actor

Commented [SJ13]: Mop Up Update - added reference to Data Collector to reflect legacy provisions as part of transition text

109 Resolution Process

- 10.1.9.1. The procedure in this Section C shall only be initiated where one of the scenarios described in Paragraph 7.3 applies. The procedure in this Section C shall not be used in relation to a <u>RMP</u> where an <u>Erroneous Switch</u> is in progress.
- 40.2.9.2. Where the requirements of Paragraph 9.1 are met, the <u>Energy Supplier</u> may initiate the procedure in this <u>REC Schedule</u> with the objective to:
 - (a) agree a <u>Switch Meter Reading</u> where no actual or estimated <u>Switch Meter</u> <u>Reading</u> has been obtained; or
 - (b) agree an alternative <u>Switch Meter Reading</u> where the original <u>Switch Meter</u> <u>Reading</u> is being disputed.
- 10.3.9.3. Where the <u>Consumer</u> is disputing the <u>Switch Meter Reading</u>, the <u>Energy</u> <u>Supplier</u> shall endeavour to reach an agreement with the <u>Consumer</u> without invoking this disputes process.
- <u>40.4.9.4.</u> The <u>Energy Supplier</u> contacted by the <u>Consumer</u> shall consider the specific circumstances as detailed below:
 - (a) where the difference between the <u>Energy Supplier</u>'s view of consumption and that derived from the initial <u>Switch Meter Reading</u> is 1,200 kWh or less for a gas <u>RMP</u> or 250 kWh or less for an electricity <u>RMP</u>, then the <u>Energy Supplier</u> shall not dispute the <u>Switch Meter Reading</u> unless the <u>Consumer</u> specifically requests a new <u>Switch Meter Reading</u>, but shall instead attempt to resolve the dispute with an accommodation (e.g. cash allowance to the <u>Consumer</u>), thus retaining the initial proposed <u>Switch Meter Reading</u>, so that no further action is then required; or
 - (b) where the <u>Consumer</u> is unwilling to accept an accommodation, or the difference between the <u>Energy Supplier</u>'s view of consumption and that derived from the <u>Switch Meter Reading</u> is more than 1,200 kWh for a gas <u>RMP</u> or more than 250 kWh for an electricity <u>RMP</u>, then the <u>Energy Supplier</u> shall initiate a dispute.
- 10.5.9.5. The <u>Consumer</u> is not obliged to provide information on the identity of either their <u>Gaining Supplier</u> or <u>Losing Supplier</u>. Therefore, the <u>Initiating Supplier</u> shall use the <u>Enquiry Service</u>s to establish the identity of the <u>Associated Supplier</u>.

7

Resolution of Consumer Facing Switching and Billing Issues

<u>9.6. For gas Supply Meter Points, eEach Energy SupplierGas Supplier</u> shall ensure they use the active settlement registers of the meter as part of the procedure for resolving missing <u>Switch Meter Reading</u>s under this Section [C].

9.6A For MHHS Metering Points, each Electricity Supplier shall ensure they use the Cumulative Register Reading for Smart Metering Assets and the Meter Register Readings for Traditional Metering Assets, as part of the procedure for resolving missing Switch Meter Readings under this Section C. This does not preclude the Electricity Suppliers from sharing Meter Register Readings for Smart Metering Assets to support resolution of Consumer billing issues.

9.6B For Non-MHHS Metering Points each Electricity Supplier shall ensure they use the active settlement registers of the meter as part of the procedure for resolving missing Switch Meter Readings under this Section C.

- 40.6.9.7. If two or more <u>Energy Suppliers</u> have sent an <u>Initial Request</u> in relation to the same problem under this Section C (referred to as a <u>Dual Initiation</u>), then the <u>Gaining Supplier</u>'s <u>Initial Request</u> shall take precedence (and it will take on the role of the <u>Initiating Supplier</u>).
- 40.7.9.8. When responding to the <u>Initial Request</u>, the <u>Associated Supplier</u> shall consider the specific circumstances and determine whether a more suitable <u>Switch Meter Reading</u> is available. The <u>Associated Supplier</u> shall either accept the proposed read, negotiate the outcome by proposing a more suitable reading, or request an <u>Actual Meter Reading</u>. Where an alternative read is provided justification should be provided.

10.8.9.9. Following agreement of the Switch Meter Reading:

- (a) for a gas <u>RMP</u>, the <u>Gaining Supplier</u> shall submit the agreed <u>Switch Meter</u> <u>Reading</u> to the gas <u>CDSP</u>, via its <u>Shipper</u>, in accordance with the <u>UNC</u> / <u>IGT</u> <u>UNC</u>; or
- (b) for an electricity <u>RMP</u>, where supply is measured by a meter that is not a <u>DCC</u> <u>Enrolled Meter</u>, the <u>Gaining Supplier</u> shall submit the agreed <u>Switch Meter</u> <u>Reading</u> to its <u>Data Collector</u>, in accordance with the <u>BSC</u>; or
- (be) for an <u>MHHS Metering Point</u>electricity <u>RMP</u>, where supply is measured by a meter that is a <u>DCC Enrolled Meter</u>, both the <u>Gaining Supplier</u> and <u>Losing</u> <u>Supplier</u> shall submit the agreed <u>Switch Meter Reading</u> to their respective <u>Data</u>

Commented [SJ14]: Existing drafting retained for gas

Commented [SJ15]: Mop Up Update - amended to reference 'MHHS' metering points as part of transition text

Commented [SJ16]: Post consultation update - added use of defined terms to align to Tranche 4 drafting.

Commented [SJ17]: Post consultation update additional sentence added to address consultation comment CD3-130

Formatted: Font: 11 pt

Formatted: Font: 11 pt

Commented [SJ18]: Mop Up Update - amended to clarify this clause applies to MHHS Metering Points as part of transition text.

<u>Collector'sData Services</u> in accordance with the <u>BSC</u>. Suppliers shall correct Consumer billing to reflect the agreed Switch Meter Reading even if it is not possible to amend the data in settlement.

- (c) for a Non-MHHS Metering Point, where supply is measured by a meter that is not an Enrolled Smart Meter, the Gaining Supplier shall submit the agreed Switch Meter Reading to its Data Collector, in accordance with the BSC; or
- (d) for a Non₂MHHS Metering Point, where supply is measured by a meter that is an Enrolled Smart Meter, both the Gaining Supplier and Losing Supplier shall submit the agreed Switch Meter Reading to their respective Data Collector's in accordance with the BSC
- 40.9.9.10. If the <u>Switch Meter Reading</u> submitted under Paragraph 9.9 is not accepted under the <u>UNC</u> / <u>IGT UNC</u> or <u>BSC</u> (as applicable), then the <u>Energy Suppliers</u> may either initiate the process described in Paragraph 3 or agree between themselves that the agreed <u>Switch Meter Reading</u> shall be used only for the purposes of <u>Consumer</u> billing.
