# 1 Introduction

## 1.1 Purpose and Scope of the Procedure

The purpose of this BSC Procedure (BSCP) is to ensure that all changes to Industry Standing Data (ISD) within the Supplier Volume Allocation (SVA) arrangements are made in an auditable and controlled manner and where appropriate with due consultation with the affected parties. ISD refers to those items of data that are required to be passed from one party to another by the Supplier Volume Allocation Agent (SVAA).

This BSCP covers the raising of a change (an ISD Change Request 'ISD CR'), authorisation and notification of ISD items to all relevant Market Participants (MPs) including the SVAA. The BSCP also covers the raising of a request to change an item of ISD whose values are linked to BSCCo developed software and the subsequent notification of such changes. However, in order to accommodate potential software changes, their authorisation must be carried out in accordance with [BSCP40](#) "Change Management". In addition, this BSCP outlines the process for effecting emergency changes to ISD.

A complete set of ISD entities together with their authorisation routes is contained in [Appendix 4.1](#).

The BSCP does not cover the distribution and implementation of changes to ISD, or changes to SVA system standing data, which are covered by BSCP703, 'BSC Central Services' and BSCP507, 'Supplier Volume Allocation Standing Data Changes' respectively. Neither should it be used to implement changes to the structure of the ISD data.

## 1.2 Main Users of the Procedure and their Responsibilities

The main users of this BSCP are:

- *Panel* - approves changes to ISD
- *MPs* – registered in accordance with BSCP38 for the purpose of interfacing with the BSCCo when managing changes to ISD.
- *SVAA* - receives notification of authorised changes to ISD from BSCCo and is involved in progressing changes to the Master Settlement Calendar, preparing Impact Assessments (IAs), and agreeing release schedules.

## 1.3 Use of the Procedure

This BSCP must be used to progress all changes to those data items designated as ISD. The need to make changes to ISD may be identified by the Panel, one of its Panel Committees, relevant BSC Agents, or Parties, depending upon the nature of the change. Appendix 4.1 outlines who can raise an ISD CR and provides a list of ISD Entities. In order to progress an ISD CR, the originator is required to complete the ISD CR (using the ISD Portal) with the aid of the scenarios set out in BSCP707 Appendix

2: ISD Change Request Entity Validation<sup>1</sup> together with the valid section from the ISD Entity Form. [Appendix 4.4](#) outlines the ISD Entity forms used by this BSCP.

There are two key milestones in this BSCP:

- The SVAA is to be notified by BSCCo of a change to ISD no later than 7 Working Days (or as otherwise agreed between BSCCo and the SVAA) before the Go Live Date.
- MPs have 2 Working Days from the notification of a new ISD version to contact BSCCo if they believe that the change to ISD as notified is not as agreed or invalid. If BSCCo determines that the ISD publish is not as agreed it will assess the severity of the impact of any error. BSCCo will then determine whether any relevant error should be removed in the next publish of ISD or whether the emergency fix process should be used ([see Section 3.5](#)).

#### 1.4 Balancing and Settlement Code Provision

This BSCP has been produced in accordance with the provisions of the Balancing and Settlement Code (the Code). In the event of an inconsistency between this BSCP and the Code, the Code shall prevail.
