1 Code Drafting Due Process Questions

Consistency Check Process
As part of the Code Drafting Consistency Check Consultation, we're interested to understand if parties believe if due process has been followed. To support this, we're seeking feedback on the Programme's code drafting consultation process, by asking six questions to gain participants' feedback. You can view these questions in the **MHHS Programme Code Drafting Due Process Questions** document.

1.1 Questions

1. Have parties been able to be engage with the Code Workstream?

2. Have parties been able to input into:
    a) Code meetings
    b) Code Artefact consultations
    c) Code decisions
3. Have comments from parties to correct text been addressed?

4. Have the Design Artefacts been correctly translated into Code?

5. Do the Code Artefacts make sense?

6. What are the Code Workstream lessons learnt?

1.2 Guidance

To submit your responses to these questions, please view the questions in the document above, and add your answers into the **Code Consistency Check Consultation Comments Log**.

You can do this by:

- Selecting **Due Process Questions** option from the drop-down menu in **Column B: Code Artefact Name** – this is the final option at the bottom of the drop-down menu
- Add your answers into **Column D: Comments** – this is a free text field for you to add your individual responses
- Each organisation should submit **one response per organisation**
- Responses should be entered into **a separate line for each answer**, e.g. one row for Q1, one for Q2 etc.
- If there is no response to a question, there is no requirement to submit a blank entry
- Please do let us know who you are and which organisation you're from by completing **Columns H-J**

If you have any questions on this consultation, please email Code@mhhsprogramme.co.uk
