- Over the past months, Central Parties, LDSOs and SIT Suppliers and Agents have been developing their own cutover plans and sharing them with the Programme
  - o Central Parties submitted their Cutover Plans and completed templates by 16 May 2025 and the Programme shared initial feedback with each party, raising further questions or asking for more information based on the level of information that they have shared
  - o LDSOs, SIT Suppliers and SIT Agents submitted their Cutover Plans and completed templates by 30 May 2025, the Programme is completing initial assurance of the submissions, and more detailed assurance will be carried out following the submission of updated / validated plans
  - o The Programme are developing a consolidated Programme M10/M11 Cutover Plan which is due to be shared with Participants in June, there are some key updates required from Central Parties to feed into this version of the plan and meet these timelines
  - o The Programme will be looking to schedule a Cutover walkthrough session with parties that are a part of the cutover to discuss a chronological run-through of the cutover activities, key learnings from the reviews, and dependencies between parties
  - o Bilateral calls will be set up with Suppliers to discuss their cutover plans and the Agents that they are working with

Updates from DCWG

- As per the updated Data Cleanse Plan v4.1, LDSOs, Suppliers and MEMs have been carrying out a series of activities related to connection type and meter type misalignments, linked import /export MPANs, and related MPANs
  - Participants have been sharing the volume of SDEP cases and exceptions as part of their self-declarations, the Programme continues to analyse responses against the EES report
  - Based on discussions at May's DCWG, a small date change will need to be made to the Data Cleanse Plan, relating to Traditional Meters installed on Current Transformers, to allow more time for Suppliers to fix these issues due to instances of Suppliers' MOPs not having the necessary information to make meter changes. The original date of 30 June 2025 has been extended to M11 and has been communicated to Suppliers

- Over the past few months, Suppliers have been investigating and resolving outstanding exceptions related to the population of ESME ID, Meter Location and Number of Displayed Register Digits, with deadlines on 16 May 2025 and 18 July 2025 for the completion of work-off plans
  - The Programme analysed responses from Suppliers regarding ESME ID and will provide a view of the next steps at June's DCWG
  - Based on figures shared by Suppliers in May, the current percentage of exceptions resolved for the population of Meter Location and Number of Displayed Register Digits is 79%

- The test process for the population of Domestic Premises Indicator will occur between 27 June – 11 July
  - LDSOs have confirmed to the Programme the individuals who require access to the SFTP environment to support this activity, and have now all been set up
  - The DCC has shared a sample extract with the Programme to help with the development of validation checks and to ensure the data items have been populated correctly

Theme	Summary	Mitigation Approach Overview
Commencing and completing Migration successfully	The theme explores the factors which may affect the Programme meeting M10 / M11 and completing Migration and how the Programme is planning to mitigate these to stop these risks from converting into issues	• Some of the existing risk factors around M10 / M11 will be mitigated by the findings throughout SIT Testing, which will evaluate assumptions, highlight to the Programme the areas which require attention and allow the Programme enough time to make the changes necessary for M10 / M11 success • The Migration Design, the Migration Cutover & Data Strategy, the Data Cleanse Plan, the Migration Thresholds Document and ongoing Code Drafting will provide Participants necessary materials to prepare for M10 / M11

Key Risks

Risk Score Assessment

Risk ID	Risk Description	Critical (30–25)	High (24–17)	Medium (16–9)	Low (8–1)	Current score movement since last MWG	Mitigation Plan
R663	There is a risk that those large Supplier Agents, who support multiple large Suppliers, will not be able to support planned migration volumes due to operational or technical constraints			I, C (14) → T (12)		Score remains at 14	1. 17/02: Programme asking all SIT Suppliers to complete the proforma and return it to PPC@mhhsprogramme.co.uk no later than 17:00 on Monday 24 February 2025. 2. 19/03: No further updates. 3. 17/06: Risk to be assessed as part of Supplier Submission 2 which closes on 20/06
R488	There is a risk that a significant volume of export MPANs created within Programme transition timescales will impact the ability of suppliers and DNOs to deliver Programme Migration		I (21)	C (13) → T (6)		Score remains at 13	1. 17/07: Awaiting formal position from Ofgem. 2. 04/12: Programme's working assumption is that Bulk creation of Export MPANs will not be undertaken until MHHS Migration is completed, however, should Suppliers plan to undertake bulk creation of Export MPANS, this needs to be included in Supplier Migration plan submissions. 3. 17/06: No further updates.
R700	There is a risk that Suppliers and Agents do not complete Qualification in line with their delivery plans and this places pressure on the volumes that need to be delivered over the remainder of the migration period			I (16) → C (12) → T (10)		Score reduced from 17 to 12	1. 16/04: Lessons learnt exercises have taken places with LDSOs and SIT Parties to understand issues with process. Technical enhancements to QAD portal to support code body tracking of responses. Resource review taking place based on lessons learnt from initial QAD submissions. REC Implementing improved query management and process which will be rolled out to parties. As PPs have been through a cycle of QAD review, expectations of Code Bodies are clearer, so less work is anticipated at the second cycle of review. 2. 14/05: Testing and code reviews are currently on track, risk scoring lowered.

R677	There is a risk that performance testing of the migration functionality within MPRS identifies an issue that cannot be resolved in time for SIT and non-SIT LDSO Non-Functional Testing. Risk is that LDSOs cannot meet migration thresholds. LDSOs need to carry out performance testing with their service providers i.e. SCS									I										C				T								Score remains at 12	1. 07/10: SIT and Non-SIT LDSO QT NF teams will share PIT evidence with MCC for them to carry out any additional assurance activity. As well as the requirement to for each LDSO to evidence that their PIT will meet Migration thresholds is set out in the PIT guidance. 2. 13/01: Programme are completing as much early testing as possible, and timelines have been reviewed by Ofgem and are realistic. 3. 17/04: Ongoing and continues to be monitored. 4. 27/05: SIT NF Testing execution is complete and with SRO for review
R828	There is a risk that Suppliers initiate more migrations than planned, or exceed the Threshold volumes																	I		C				T								Score reduced from 18 to 12	1. 14/02: Exploring regulatory mechanisms that deal with scenarios where participants breach agreed system thresholds. 2. 19/09: Migration governance framework developed with MWG. Incentives to be developed with Code Bodies. 3. 04/12: Migration Governance Framework has defined governance processes, awaiting Ofgem CR055 directive outcomes. 4. 04/04: No further updates. 5. 06/05: The ELS model has been baselined which sets the overall number of migrations that can take place daily during each phase of ELS. The MCC will ensure that participants plan within these volumes. 6. 10/06: Migration team are working on the processes at the moment to deal with instances where Migrations exceed the Thresholds. The team plan to discuss these draft processes at the July MWG. Scoring reduced.
