**ISD Publication Frequency Change**

**Issue Statement:**

- There is a set of activities that must be undertaken following a party’s qualification, prior to that party being able to become active in the MHHS arrangements.
- To protect migration timescales this process should be as short as possible to allow parties to commence migration as soon as possible.
- One key element of this activity is the publication of ISD following a party’s qualification. Currently the publication frequency is monthly which may cause delays if the timing of qualification falls shortly after an ISD publication.

**Description of Change:**

- It is proposed that the MHHS-16 requirement is changed so that the publication frequency is increased from monthly to fortnightly.
- The Service Activation Working Group has considered the impact to MDD and believe that MDD can remain at monthly frequency if prospective MHHS parties are pre-populated in MDD. It is felt that this has no impact as parties cannot interact with the prospective MHHS parties until there have gone through the full set of Qualification and Service activation processes.
- Increasing the frequency of ISD publication will bring forward the date when parties can commence migration thus mitigating the risk of lost migration capacity and serving to protect the M15 milestone.

**Target Date of Change and Next Steps:**

- Following this industry webinar, the Change Request will be issued to Impact Assessment. The results of the Impact Assessment will be reviewed by the Change Board, who will provide a recommendation to the SRO to approve or reject the Change Request at the Programme Steering Group.
